Lesson Title: Final Requirement : Discussion of Standard

Materials:

SAS/Computer/Notepad++/Sublime text/Online coding app/Webcode app

Lesson Objectives:

At the end of this module, I should be able to:

1. Understand the concept of the final requirements
2. Understand the basis for grading the final requirements

Productivity Tip: Better start planning/ sketching your website to be able to visualize the actual look of your website.

A. FINAL REQUIREMENT DETAILS

To evaluate all your learnings from this program, instead of an examination, you are expected to create/ develop a working website with layout, multimedia, CSS and basic form submission. You are also going to create documentation of your website. Finally, an actual presentation will also be conducted. Take note that this is an **individual requirement**.

STANDARDS

All Pages

- Use a decent header with your own images. Please avoid getting ready-to-use headers on the web.
- All the pages may have the same layouts but may differ in element color, background color or images.
- Do not use too many color combinations, you may check <https://colorhunt.co/> for color guides.
- Each page must be linked to each other (except the log-in and the one with data summary).
- Include styling on links, no blue/violet color default colors.
- An integrated database must be populated with at least 5 records of id, username & password
- For specific standard of each page, check the listing below:

Name: _____

Class number: _____

Section: _____ Schedule: _____

Date: _____

Page 1: Log In

- Include a form for username, password entry and a submit button.
- A successful log-in directs to the profile page.
- The page will just reload for unsuccessful log-in.

Page 2: Profile

- The content must include your profile : Name, Address, Course, etc. and a short description (2-3 paragraphs) about yourself.
- A background music must play automatically in the background.
- Include an iframe with a Youtube video that you think best describes you.

Page 3 : Gallery

- The content area must include a set of images, either personal images, pictures of interests/hobbies or anything you want to share with attachment of at least 10 images.
- Include a short description of why you are interested to share these.
- Images must be arranged well as if a photo album on social media sites.
- Just below the images, include a playlist of 3 audio files, again with short description.
- Please do not use vulgar or inappropriate images and sounds.

Page 4 : Diary Entry

- The content area must include a form that will accept data entries for the following :

TOPIC :

Category : (Home, Personal, School, Peers, Others) one category to each topic

Content : (long text)

Date : (include a date picker)

Submit Button (will save the data to the database then directs to Page 5

Page 5 : Diary Listing

Name: _____
Section: _____ Schedule: _____

Class number: _____
Date: _____

- The content area must include a list of all diary entries like a Facebook wall.
- Each Topic, Category, Date and Content must be displayed.

UPLOAD your HTML FILES, images,css in any free website domain. You will only submit the link of your website.

Example of FREE WEBSITE DOMAIN :

-> <https://ph.000webhost.com/>

->Google cloud hosting

IMPORTANT NOTE:

→ Make sure to save your homepage or landing page as index.html

B. FINAL REQUIREMENT GRADING

The website will be graded based on the following criteria:

Compliance to the webpage requirements	15 points
Design and Layout, CSS	15 points
Form Submission, PHP	15 points
Database	5 points
Correct Use of Form Elements	10 points
TOTAL	60 points

The final requirement will be recorded as the final examination and will be distributed as:

WEBSITE	60%
DOCUMENTATION	10%
PRESENTATION	30%
TOTAL	100%

Name: _____
Section: _____ Schedule: _____

Class number: _____
Date: _____

C. LESSON WRAP-UP

Thinking about Learning (5 mins)

Congratulations for finishing this module! Shade the number of module/s that you finished.

You are done with the session! Let's track your progress.

Period 1											Period 2											Period 3									
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	17	18	19	20	21	22	23	24	25	26	27	28	29	30	31
